**Brief content of the academic discipline:**

The academic discipline "Psychology" is a discipline of the psychological and pedagogical module of the component of the institution of higher education of the curriculum and is an integral part of professional education in terms of the formation of the psychological culture of a specialist. The academic discipline is an integrated course and consists of four sections: "General psychology", "Age psychology", "Social psychology" and "Pedagogical psychology". Studying the foundations of general psychology will allow future specialists to get acquainted with key psychological concepts, patterns, types and properties of various mental phenomena, which will be the basis for mastering the foundations of applied branches of psychology. When building and organizing the educational process, the implementation of translation activities, a specialist must take into account general patterns and mechanisms of mental development, individual and age characteristics of the person, as well as the psychological foundations of the process of education.
