

**The name of the academic discipline:  
“Methodology for solving Olympiad tasks”**

<b>Specialty code and name</b>	1-01 02 01 Primary Education
<b>Year of study</b>	4
<b>Semester of study</b>	8
<b>Number of in-class academic hours:</b>	40
<b>Lectures</b>	16
<b>Seminar classes</b>	–
<b>Practical classes</b>	24
<b>Laboratory classes</b>	–
<b>Form of the current assessment (<i>credit/graded credit /exam</i>)</b>	credit
<b>Number of credit points</b>	3
<b>Competences</b>	BPC-5. To select the content, forms, methods and means of teaching and upbringing, apply them in the educational process taking into account the age and psychological characteristics of students. SC-5. To teach solving text problems based on the use of various methodological techniques.
<p style="text-align: center;"><b>Summary of the academic discipline:</b></p> <p>The content of the discipline “Methodology for solving Olympiad tasks” is aimed at familiarizing future primary school teachers with solving non-standard Olympiad tasks, which usually do not require knowledge that goes beyond the program or exceeds the level of development of children of the corresponding age. However, they are formulated in such a way that their solution presupposes an original approach, the ability to assess the situation from different angles. This discipline allows you to systematize Olympiad tasks for students in I-IV grades, generalize, expand and deepen the knowledge and skills of students about the methods of solving Olympiad tasks and consider the methodological features of working with them.</p>
