Competencies to be formed	To apply psychological technologies to create effective communication, psychological protection from manipulation and prevention of threats to personal safety; to carry out educational, research and innovative activities by introducing pedagogical innovations to improve educational practice.
Summary of the content of the academic discipline:	
The course is aimed at teaching students the basics of perinatal psychology, namely the psychology of conception, pregnancy, childbirth, perinatal losses, postpartum depression, and assuming the role of a parent. In the course of study, not only theory, but also diagnostic and psychologically corrective approaches to working with couples and extended families are given.
