

The name of the academic discipline:
«System integration and software configuration»

Code and name of specialty	1-26 03 01 Information resource management
Training course	1
Semester of training	2
Number of class hours:	56
Lectures	28
Seminar classes	-
Practical classes	-
Laboratory classes	28
Form of current assessment (credit/differential credit/exam)	credit
Number of credits	3
Competencies to be formed	Analyze technical solutions for the formation of hardware and software components of the information infrastructure, taking into account the methods of discrete mathematics.
<p style="text-align: center;">Brief content of the academic discipline:</p> <p>The course "System Integration and software configuration" focuses on the study of the basic concepts of the conceptual foundations and classification of operating systems, the principles of process and memory management, the functioning of operating systems in real and secure operation, and the prospects for the development of system software.</p>
