The name of the academic discipline:
"Administration of Information Systems"

Specialty code and name	1- 26 03 01 Information Resource Management
Year of study	3
Semester of study	5
Number of in-class academic hours:	60
Lectures	30
Seminar classes	-
Practical classes	-
Laboratory classes	30
Form of the current assessment (*credit/ graded credit /exam*)	exam
Number of credit points	3
Competences	Mastering the academic discipline "Administration of Information Systems" should ensure the formation of the following competence: use basic techniques for setting up, administering and maintaining system software.
**Summary of the academic discipline:**	

Summary of the academic discipline:

The academic discipline "Administration of Information Systems" forms practical skills necessary for working with modern information systems; develops professional competencies related to the management and support of IT infrastructure; prepares students to solve problems arising in real professional activities. This discipline is aimed at acquiring knowledge by students about the basics of administering network operating systems; familiarization with network technologies for building a local area network; acquisition of practical skills in selecting and deploying network services, configuring network protocols, improving network efficiency and ensuring data protection.
