

Academic discipline:**« Pedagogical foundations of teaching and raising preschool children »**

Code and name of specialty	6-05-0112-01 Preschool education
Training course	1
Semester of training	2
Number of class hours	50
Lectures	22
Seminar classes	-
Practical classes	22
Laboratory classes	6
Form of current assessment (credit/differential credit/exam)	exam
Number of credits	3
Competencies to be formed	To project and implement the processes of teaching and upbringing of preschool children in different types of children's activities; to select and adapt the content of didactic material, methods and forms in accordance with the capabilities of pupils.

Brief content of the academic discipline:

The purpose of the academic discipline is to form the readiness of the future preschool educator to carry out teaching and educational activities, taking into account social, age, psychophysical and individual characteristics of pupils and current trends in the development of preschool didactics and the theory of education. Structurally, the content of the discipline includes two interrelated sections "Theory and methodology of education of preschool children" and "Theory and methodology of organization of educational activities of preschool children". Studying the discipline "Theory and methodology of teaching and upbringing of preschool children" will ensure the formation of professional competence, the ability to design, program and implement the processes of teaching and upbringing of preschool children in various types of children's activities through innovative educational technologies, in the context of the requirements of the modern preschool education system.
