

**Academic discipline:  
"Mathematical analysis"**

<b>Code and name of specialty</b>	6-05-0113-04 Physics and mathematics education (mathematics and computer science)
<b>Training course</b>	1 / 2
<b>Semester of training</b>	1 / 2 / 3
<b>Number of class hours:</b>	150
<b>Lectures</b>	56
<b>Seminar classes</b>	-
<b>Practical classes</b>	94
<b>Laboratory classes</b>	-
<b>Form of current assessment (credit/differential credit/exam)</b>	Credit/credit/exam
<b>Number of credits</b>	9
<b>Competencies to be formed</b>	To master the classical sections of mathematical disciplines for the implementation of educational and research activities
<b>Summary of the content of the academic discipline:</b>	
Sets. Functions. The limit of the numerical sequence in $\mathbf{R}$ . The function limit of a single variable. Continuous functions and their properties. The derivative and differential function. The main theorems of differential calculus. Applications of differential calculus. The indefinite integral. A definite integral. Improper integrals.
