<b>Competencies to be formed</b>	To possess a foreign language: to communicate in unpredictable situations, to understand spoken and written language; to be able to choose the appropriate style of speech (informal, neutral, formal, scientific) and use the language material correctly; To be able to perceive adequately professionally oriented texts, to analyse scientific branch information, to prepare scientific and public speeches.
<b>Brief content of the academic discipline:</b>	
<p>The structure of the Foreign Language course includes two consecutive modules. The first one - the social communication module - allows deepening and systematisation of the learners' grammar, lexical, communicative skills and communicative models corresponding to various everyday situations. The second part of the course - the professional communication module - addresses professional communication situations, professional and specialised vocabulary and its specific application, and provides the necessary skills for abstracting topical texts.</p>
